

Life Cycle

Amazing Fact

Turritopsis dohrnii, the immortal jellyfish, is a species of small jellyfish found in the Mediterranean Sea. It does not die but reverts back to an immature stage after reproducing. Therefore, it can live forever as long as it doesn't get eaten!

This is very unusual! Most other living creatures follow the same life cycle process.

Research the life cycle of your chosen mammal and fill in the given diagram.

You could also try to find out:

- what else lives in the Mediterranean Sea;
- what age the oldest human lived to;
- if there any famous stories, myths or legends about immortal characters;
- what other interesting species of jellyfish exist.
