

## Add and subtract using place value

1.  $124\,925 + 3004 = \square$
2.  $480\,672 - 40\,030 = \square$
3.  $320\,516 + 70\,060 = \square$
4.  $235\,032 + 10\,500 = \square$
5.  $762\,056 - 400\,002 = \square$
6.  $305\,607 - 1004 = \square$
7.  $632\,654 + 130\,005 = \square$
8.  $750\,806 - 40\,800 = \square$
9.  $723\,586 - 200\,040 = \square$
10.  $200\,030 + 414\,521 = \square$
11.  $234\,056 + 99\,999 = \square$
12.  $723\,085 - 199\,999 = \square$
13.  $234\,917 + 299\,999 = \square$
14.  $536\,005 - 199\,999 = \square$
15.  $102\,304 + 39\,999 = \square$
16.  $723\,215 - 399\,999 = \square$

17. When rounding a large number up to solve an addition or a subtraction, what is the rule for adjusting?

## Add and subtract using place value
