

Mixed numbers

Draw a number line from 0 to 4 for each example and mark on the given fractions. Compare with a partner:

1. $2\frac{1}{2}$, $3\frac{1}{4}$, $1\frac{2}{3}$, $\frac{3}{4}$
2. $3\frac{1}{4}$, $1\frac{3}{8}$, $2\frac{1}{2}$, $\frac{5}{8}$
3. $\frac{5}{6}$, $1\frac{1}{6}$, $2\frac{3}{4}$, $3\frac{1}{3}$
4. $3\frac{4}{5}$, $2\frac{1}{3}$, $\frac{5}{8}$, $1\frac{2}{3}$
5. $2\frac{1}{3}$, $1\frac{5}{8}$, $2\frac{5}{6}$, $3\frac{3}{5}$, $\frac{7}{8}$, $2\frac{3}{4}$

Write the next six fractions in each sequence.
Write all fractions in their simplest form:

6. $\frac{1}{8}, \frac{1}{4}, \frac{3}{8}, \frac{1}{2} \dots$
7. $\frac{1}{6}, \frac{1}{3}, \frac{1}{2}, \frac{2}{3} \dots$

8. Write the fraction sequences for twelfths, up to $1\frac{1}{2}$.
Write all the fractions in their simplest forms.

Mixed numbers
