

## Shape clues

Draw a line to match each description to a polygon.

- 1 A quadrilateral with three obtuse angles
- 2 A quadrilateral with only one pair of parallel sides
- 3 A polygon with two right angles
- 4 A polygon with only one pair of perpendicular sides
- 5 A parallelogram

## Measured thinking

List as many units as you can, including standard and imperial units, for measuring:

6 Length

7 Weight (mass)

8 Capacity

9 A person is 5 feet, 10 inches tall. There are 12 inches in one foot. How many inches tall are they?

10 1 inch is approximately the same length as 2.5 cm. How tall is the person above in metres?

## Ordering challenge!

11 Write all the units you wrote for question 6 in order of length, smallest unit first.
