

Finches

Take a look outside in your garden: there is a good chance that you will see a finch feeding on seeds or singing their tuneful melodies from the top of a tall tree. Make sure you look carefully at that miniature flock racing past your window: they might just be finches flying quickly to find their next meal. Finches come in all sizes and colours. Siskins are small, neat finches with a smallish head and a short, forked tail; males are strikingly green and yellow with a black forehead and bib. The bullfinch, however, is a bulky-looking bird; the males are strikingly black, grey and carmine red. Another colourful member of this family is the chaffinch. This slim, long-tailed, sparrow-sized bird lives along woodland fringes and regularly visits gardens.

Circle the correct option to complete each sentence below.

a. The text begins by...

explaining where finches live.

watching finches making nests.

telling the reader where to buy seeds.

inviting the reader to look for birds.

b. If you look carefully at a flock of birds racing by, you...

are guaranteed to see finches.

may see finches.

will rarely ever see finches.

will never see finches.

c. Male siskins are striking due to their...

distinctive appearance.

unusual behaviour.

similarity to chaffinches.

black, grey and red colouring.

d. A slim, long-tailed member of the finch family is...

always in your garden.

a bullfinch.

a chaffinch.

a male siskin.

Finches Answers

Take a look outside in your garden: there is a good chance that you will see a finch feeding on seeds or singing their tuneful melodies from the top of a tall tree. Make sure you look carefully at that miniature flock racing past your window: they might just be finches flying quickly to find their next meal. Finches come in all sizes and colours. Siskins are small, neat finches with a smallish head and a short, forked tail; males are strikingly green and yellow with a black forehead and bib. The bullfinch, however, is a bulky-looking bird; the males are strikingly black, grey and carmine red. Another colourful member of this family is the chaffinch. This slim, long-tailed, sparrow-sized bird lives along woodland fringes and regularly visits gardens.
