

# Choosing a strategy

Count on to add these.

1  $42 + 23 = \square$

2  $36 + 31 = \square$

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18		
21	22	23	24	25	26				
31	32	33	34						
41	42								

Use partitioning to add these.

3  $36 + 48 = \square$

4  $27 + 55 = \square$

Choose how best to work these out.

5  $46 + 37 = \square$

7  $23 + 51 = \square$

6  $53 + 19 = \square$

8  $58 + 26 = \square$

Count back to answer these.

9  $74 - 13 = \square$

10  $58 - 22 = \square$

Use Frog for these.

11  $65 - 38 = \square$

12  $83 - 37 = \square$

Choose how best to work these out.

13  $57 - 19 = \square$

16  $86 - 29 = \square$

14  $73 - 47 = \square$

17  $58 - 31 = \square$

15  $65 - 22 = \square$

18  $94 - 58 = \square$

Write your own additions and subtractions and choose how to work them out.

I am confident with choosing an addition or subtraction method.
