

Famous Engineers

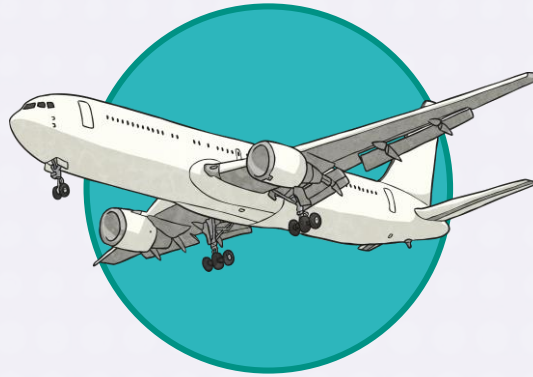

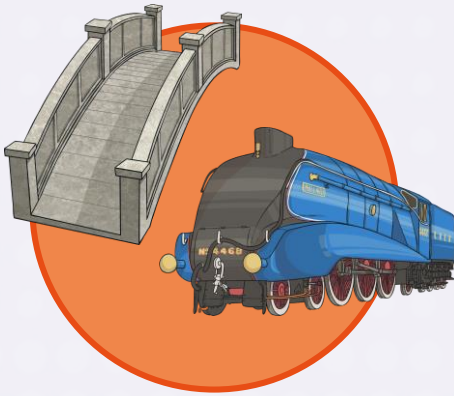

What Is Engineering?

Engineering is about solving problems by creating a new product or improving an existing product.

Engineers...

Think about it

Look around the room you are in and think about how engineers would have been involved in just about everything you can see, from which materials are used to how the ceiling stays up.

What Skills Do You Need to Be an Engineer?

Think about what skills and knowledge you would need to be an engineer and then compare your ideas with some of the suggestions below:

Close Your Eyes...

Imagine an engineer

Pioneering Female Engineers

These are the women who made groundbreaking inventions or development in the late 19th century and first half of 20th century.
