Hieroglyphs

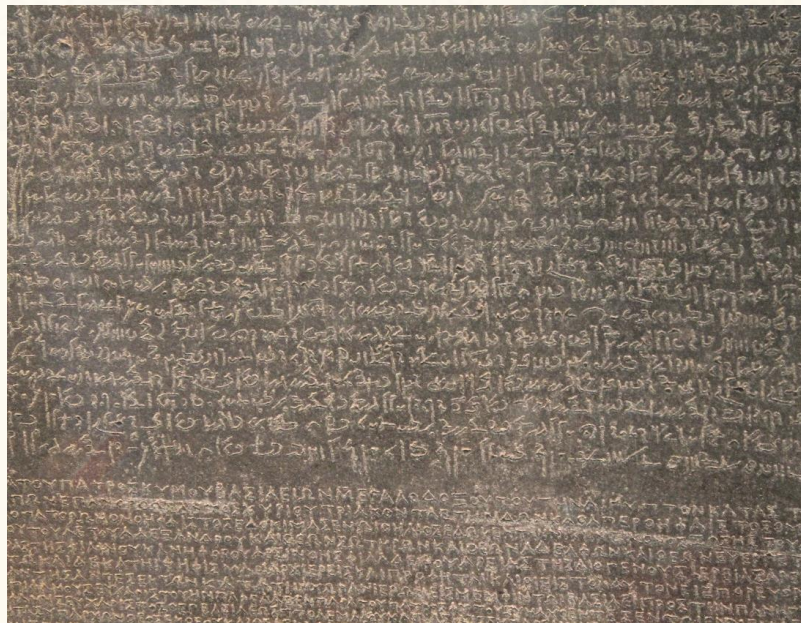

Hieroglyphs are an ancient Egyptian way of writing that uses pictures instead of letters.

The Rosetta Stone

The Rosetta Stone is famous because it contains hieroglyphic script that specialists were able to decode (make sense of).

It was found in 1799 and took twenty years to translate. It is inscribed in three parts; the top and middle texts written in Ancient Egyptian hieroglyphic script, and the bottom written in Ancient Greek.

Cartouches

The word 'hieroglyph' means sacred (or special) carving. There are over 700 hieroglyphs.

They can be written from the top to the bottom of the page, or across the page just as we write.

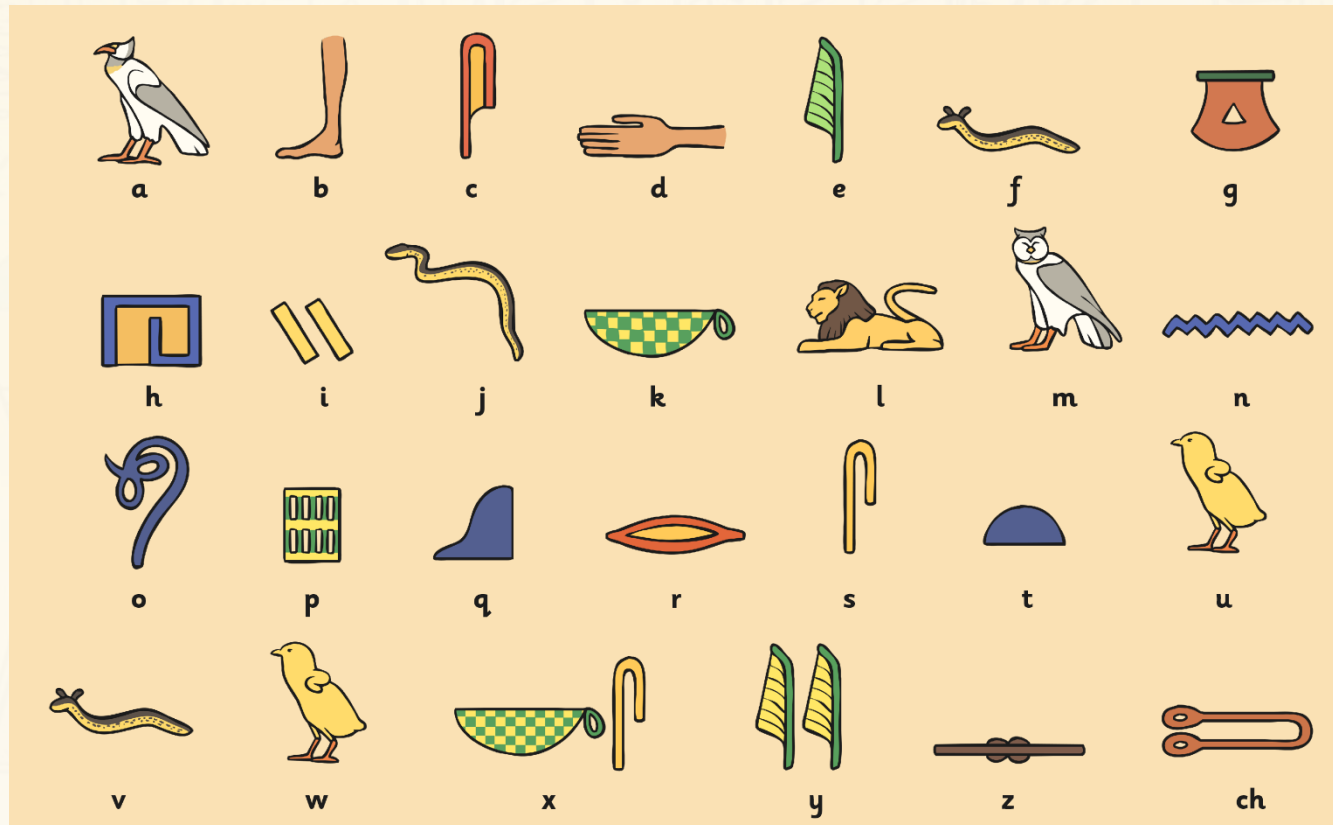

The Egyptians wrote the names of their kings or queens inside an oval shape called a **cartouche**, to show that they were special.
