

We need oxygen **and** we need water.

The Earth gets more crowded each year **and** humans need more fuel.

Planets close to the sun are too hot for us, **while** those far away are too cold.

Some people think that a meteor hit the Earth, **killing off most living creatures.**

More people live on Earth than before **so** we need more oil, gas and coal.

The astronauts began a pretend mission to Mars, **to see how they would cope with the long journey.**

Fish tended to swim in loops **instead of in straight lines.**

On Earth we get oxygen from plants **but** we have not found any plants on Mars.
