

A right angle is what is known as a 'perfect corner'. It is  $90^\circ$ .

To make a right angle measure, you need to fold a piece of paper in half and then fold it in half again.

You then use the corner of the right angle measure to test whether an angle is a right angle.

Use a right angle measure and write whether each angle is  $90^\circ$ , more than  $90^\circ$  or less than  $90^\circ$ .
