

Remember when you are adding 2 digit numbers, you need to add the tens and then the ones.

e.g. $62 + 53 =$

$$60 + 50 = 110$$

$$2 + 3 = 5$$

$$110 + 5 = 115$$

When you are adding 3 digit numbers, you need to remember to add the hundreds, then the tens followed by the ones.

e.g. $134 + 253 =$

$$100 + 200 = 300$$

$$30 + 50 = 80$$

$$4 + 3 = 7$$

$$300 + 80 + 7 = 387$$

Answer these additions using partitioning.

1 $24 + 57 = \square$

9 $32 + 76 = \square$

17 $87 + 47 = \square$

2 $71 + 29 = \square$

10 $98 + 61 = \square$

18 $93 + 78 = \square$

3 $35 + 47 = \square$

11 $56 + 63 = \square$

19 $322 + 236 = \square$

4 $63 + 28 = \square$

12 $83 + 74 = \square$

20 $255 + 423 = \square$

5 $77 + 18 = \square$

13 $59 + 76 = \square$

21 $583 + 204 = \square$

6 $62 + 19 = \square$

14 $83 + 77 = \square$

22 $537 + 462 = \square$

7 $84 + 45 = \square$

15 $65 + 76 = \square$

8 $63 + 72 = \square$

16 $47 + 95 = \square$
