

Add 3-digit numbers

Use place-value cards if this would be helpful.

1. $345 + 424 = \square$

2. $271 + 518 = \square$

3. $426 + 152 = \square$

4. $154 + 603 = \square$

5. $626 + 314 = \square$

6. $365 + 219 = \square$

7. $124 + 758 = \square$

8. $525 + 346 = \square$

9. $396 + 113 = \square$

10. $458 + 471 = \square$

11. $660 + 284 = \square$

12. $174 + 345 = \square$

13. $377 + 235 = \square$

14. $656 + 267 = \square$

15. $383 + 158 = \square$

16. $674 + 287 = \square$

17. Find some ways of completing this calculation:

$$3\square5 + 26\square = 6\square\square$$

Add 3-digit numbers

Use place-value cards if this would be helpful.

1. $345 + 424 = 769$

2. $271 + 518 = 789$

3. $426 + 152 = 578$

4. $154 + 603 = 757$

5. $626 + 314 = 940$

6. $365 + 219 = 584$

7. $124 + 758 = 882$

8. $525 + 346 = 871$

9. $396 + 113 = 509$

10. $458 + 471 = 929$

11. $660 + 284 = 944$

12. $174 + 345 = 519$

13. $377 + 235 = 612$

14. $656 + 267 = 923$

15. $383 + 158 = 541$

16. $674 + 287 = 961$

17. Find some ways of completing this calculation:

E.g. $335 + 265 = 600$

$345 + 261 = 606$
