

Today we are all going to partition the number into 10s and 1s then add the 1s, then add the 10s and make the new number by combining the totals!

$$45 + 23 + 14 =$$

We will work it out by first adding the ones and then the tens.

$$5 + 3 + 4 = 12.$$

$$40 + 30 + 10 = 80$$

Then you need to add the tens and ones together.

$$70 + 8 = 78$$

So the total is 78.

Remember you should know $5 + 3 + 4 = 12$, and $4 + 3 + 1 = 8$ so $40 + 30 + 10 = 80$. *This is easy if you know your number facts!*

1. $33 + 43 + 15 =$

2. $22 + 37 + 12 =$

3. $25 + 47 + 24 =$

4. $36 + 35 + 32 =$

5. $22 + 35 + 61 =$

6. $29 + 35 + 17 =$
