# Think a Happy Thought

Let's all sit very quietly.  
Try to clear your mind.  
If it helps, you can close your eyes.  
Now, think of a happy thought...  
This could be something you are looking forward to or a happy occasion that you were part of. It might be a thought about a particular person or place that makes you feel happy.

# What Is Positive Thinking?

Is the bottle half-full or half-empty?

People say that someone with a positive attitude will see the bottle as half-full.

They look at the positive (noticing that there is still some drink left), rather than the negative (noticing that some drink has gone).

# A Positive Attitude

Thinking positive thoughts and trying to see the best in a situation is called having a positive attitude. It can help to make you a happier person and plays an important part in improving your mental health.

# A Positive Attitude

Someone who usually has a positive attitude is an **optimist**. They look on the bright side, look for the positives and approach problems as challenges to be overcome.

A person who tends to focus on the negatives and see problems in things is a **pessimist**.

It would be difficult to be an optimist all the time, but **optimistic** people are often happier, which can help them in their every day lives and make them enjoyable people to be around.
